

28.10.23

Dear Coal Indian,

As we embrace Cybersecurity Awareness Month as per the direction of the Ministry of Home Affairs (MHA), it's our duty to educate and empower ourselves to safeguard our organization, our data, and our individual online lives.

In our interconnected world, the importance of safeguarding sensitive information and maintaining a secure digital environment cannot be understated. Cyber threats are constantly evolving, and our vigilance must evolve with them. It's crucial that we all play a part in protecting ourselves and our organization from potential security breaches.

Throughout this month, the System department at CIL & Subsidiaries has been conducting various awareness activities and training sessions to keep you informed and engaged. I encourage you to participate actively and ask questions to strengthen your understanding of cybersecurity best practices. If you have any questions or concerns about cybersecurity, please don't hesitate to reach out to our System department/CCMP Team.

Remember that our cybersecurity is a collective effort, and each one of us plays a crucial role in protecting our digital assets. **Cybersecurity is not just an IT issue; it's everyone's responsibility.**

Thank you for your dedication to the security of Coal India Limited and your commitment to making our workplace safe from cyber threats. Let's make Cybersecurity Awareness Month 2023 a time of learning, reflection, and action.

Let's continue to stay vigilant and prioritize cybersecurity not only this month but every day. Together, we can fortify our defences and keep our digital world safe.

Best Regards,

(P.M. Prasad)
